

TUNIS HALIMA:- MY EDUCATION JOURNEY

CIPAD is a local NGO which has started the year 2007. The project is known for helping the poor and vulnerable family with; FOOD AND NUTRITION, HEALTH, EDUCATION, SHELTER, CARE, PROTECTION AND LIVELIHOODS.

My family was registered into this project through a village elder who knows about the low income of my family. I have only a mother who is also mentally challenged. In the year 2009, they help me to join a primary school for me to access my right to education, which is important for my life.

Abdi Okotu and Paul usually come to the school every term to check whether I am healthy and performing good in my studies. Every year they provide us with school uniform, books and pens during school holidays.

During holidays, they call for a forum for guidance and counselling. They guide even our parents on how to keep poultry farming. They also give the seeds and guide them on how to manage nursery beds.

After I finished my eight years in primary level, the project supported me to join secondary school that is a boarding school. They paid my school fees every term. This helped me not

Drop out of school while my colleagues are at school learning.

During holidays, the managers of this project employ a teacher who teaches us computer studies at OBBITU CHILDREN HOME, and I really benefited and appreciate the effort of this project.

I finished my four years of secondary level in the year March 2021 but I was supposed to finish in the year November 2020, because of outbreak of COVID 19.

I got an average grade which is a C-plain which can make me to qualify for a diploma course. I wanted to apply for Nursing and other related diploma courses.

I hope the project will help me to pursue my carrier. MAY GOD BLESS THE PROJECT FOR ITS EFFORT.

Thank you
