MADE IN
AFRICA

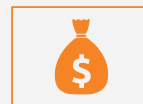

The number #1 clean cookstove company in the world!

With over 3.6 million cookstoves sold since 2013, and functional carbon development projects across Africa, BURN is the world's only full value chain carbon project developer. Our high quality and high-efficiency cookstoves have revolutionized cooking across 20 countries worldwide.

We harness the expertise of our over 2,500 employees across multiple facilities to design, manufacture and distribute over 250,000 stoves every month.

Our diverse range of revolutionary cooking appliances includes charcoal, wood, electric, hybrid and liquid fuel options, while our line of accessories includes a cookware line of our own manufacture, and a grill built to fit all our cookstoves.

Our Impact

Helped customers save **\$594 million** in fuel costs
